L. Smith, OOM, RFFO

Enclosed is the proposal for additional sampling for Operable Unit (OU) 11 - West Spray Field at the Rocky Flats Plant, submitted pursuant to the IAG paragraph 191. The additional sampling is due to recently discovered photographs that show the aerial extent of spray application further to the east than previously thought. The photographs and sample locations were given informally to Arturo Duran, Environmental Protection Agency, and Dave Norbury, Colorado Department of Health on June 14, 1993. No concerns were raised at that time.

Drilling is proceeding in the West Spray Field according to Technical Memorandum - Revised Field Sampling Plan and Data Quality Objectives for OU 11. The approved scope will be completed by July 23, 1994, and work will begin on the additional wells. If no comments or concerns are received by the Department of Energy by this date, work will proceed as proposed under the assumption that the proposal is agreed to.

If you have questions or comments, please contact Jen Pepe of my staff at 966-2184.

Sincerely,

Steven W. Slaten

IAG Project Coordinator
